Environment Product Declaration: EPD

(Environmental Product Declaration (EPD), Environmental Label under ISO 14025 and EN 15804 certifying the environmentally-friendly manufacturing process upon inspection by the globally accepted central committee, which ensures that our products are of international standards, safe and fit for use.

U.S. Green Building Council

Adds credits to buildings which contributes to LEED certification by U.S. Green Building Council

First of Thailand certified the Singapore Green Label

We are the first manufacturer in Thailand obtaining Green Label Certificate from Singapore which certifies the use of environmentally-friendly materials

Most admired brand of wood substituted product for 10 years in a roll

Rewarded from marketing research of the most trusted brand and consumers' buying decision factors by BrandAge magazine together with leading academic institution to survey respondents nationwide.

SHERA's green heart for sustainable environmental value

SHERA's products emphasize the Green Policy since the beginning. Therefore, we aim at developing Green Products by using energy-efficient and environmentally-friendly technology (Green Technology) at each processing stage to fulfill the needs of modern living while getting along with the rapidly changing world to ensure peaceful living between humans and the nature (Green Living).

SHERA ensures you will get a completely beautiful house with high quality and international standards

SHERA is the first leader in Thailand to develop fiber cement product innovations which can substitute real wood in every function including roof, ceiling, wall, flooring, and decorative wood application until it becomes locally and globally known for our unique works.

Most importantly, SHERA is the leading fiber cement innovation producer which has been certified for environmentally-friendly product quality and manufacturing standards by world-leading certification

Green Innovation

SHERA responds to our customers and their family with innovative development of wood substituted products for flooring, walling and ceiling applications that serves all needs in your home and other buildings

SHERA

SHERA has been Thailand's first leader of complete synthetic wood since 1997 by application of globally accepted cutting-edge manufacturing technology including

Hatschek Technology

SHERA wood is produced with Hatschek technology to ensure its strength by elaborately weaving fiber cement in each layer and applying complete chemical interaction process to create outstanding SHERA products which are stronger and more flexible than materials made with any other processes. Then, the products are transferred to molding process.

Autoclave Technology

Under the internationally accepted Autoclave technology, SHERA wood become one of the most perfect materials. Our products are baked in the pressure and heat controlled room to ensure that each piece of wood is of the same quality standard.

All SHERA's products are, high quality international standards.

Ceiling Application

The fundamental of ceiling application is to create a sense of beauty while providing great functionality to a house such as preventing heat transfer from the rooftop, facilitating ventilation under the roof, as well as giving the house a clean, neat and pretty finish. Since ceiling will have to go through seasonal changes that usually come with water, humidity and termite problems especially in hidden, hard-to-clean spots, it's also important to keep strength and durability in mind so that owners can enjoy the comfort of their own houses without having to worry about maintenance.

SHERA Vent Ceiling

Sunlight in Thailand can increase temperature and humidity in your home and make it unpleasant to live in. That's why it's important to choose the right material that comes with great benefits to make your home pleasurable again. SHERA Vent Ceiling can tolerate sunlight and rain. It is also rot-resistant and suitable for exterior soffit. By facilitating the wind flow and ventilation under the roof, SHERA vent ceiling can make your home cooler and more comfortable even without air conditioning and therefore helps reduce your electricity use.

Wall Application

Wall is a key element of home building in terms of boundary forming and indoor space allocating. From exterior wall to room partition, wall helps to provide protection from outside and divide the space inside your home proportionally based on lifestyles of all family members. Therefore, this wall should be strong and durable enough to provide a long-lasting service of protecting your privacy and upholding the beauty of your common space.

Underlay SHERA Board

Underlay Board for Floor

SHERA Board with 8, 10 and 12 mm. thickness helps you prepare the flooring surface quicker than other conventional methods, a better way to achieve a completely level floor with less installation time. It also prevents further moisture issues and provides a quality substrate for various finishing such as ceramic tiles, engineered wood, laminate, parquet and rubber tiles. SHERA Board will help adjust level of flooring surface easier, smoother, and more durable.

Underlay Board for Roof

SHERA Board with 6, 8, 10 and 12 mm. thickness is an essential protective layer that helps prevent water leaking from the roof. It's suitable to apply as an underlay to roofs with 25-40 degree pitch. And for the maximum result, it's recommended that SHERA board is installed on rafters horizontally prior to installing purlins and roofs.

SHERA Deco Board

Allow your space to show off its strikingly beautiful texture and architectural dimension with *SHERA Deco Board*. These beautiful patterns are crafted to go with several designs, making your home decor project more unique and outstanding than ever. *SHERA Deco Board* comes with a full range of properties including resistance to weather, water, moisture and fire which are the key components in terms of functionality. It's also soundproof and impact-resistant, which is ideal for both internal and external decorative applications. Installation is easy with screwing, cutting and drilling. In a word, *SHERA Deco Board* gives you a very convenient way to make your room look perfect.

Floor Application

SHERA™

build better, live better

Floor is the main part of every home and building needs to be planned since the beginning. Besides supporting the weight of all structures, nice flooring can make a striking statement in your home and building comfort feeling under your feet. That's why It's important to choose the right material by looking at qualifications, room's functions, budgets and designs that match your need.

SHERA Floor Plank is the answer to everything you need for flooring installation due to its high strength. In addition to that, it does not bend, swell, twist, nor squeak. It's also termite-resistant and easy to install. Combining all these properties together, **SHERA Floor Plank** helps ensure the durability and beauty of the floor that's going to last the full lifespan of your home.

Besides its toughness and wood-like beauty, **SHERA Stair** also comes with the ease of installation to make the most out of its strength, the ability to be applied to metal frame or concrete frame, and extensive options to suit the design of your choice.

NEW SHERA Stair Color Through Anti Slip

Be safe everywhere with our special anti-slip coating that enhances slip-resistant performance on the wood surface. This helps reduce the risk of slipping and falling off the stairs even when your feet are wet, so you can stay confident and worry free.

SHERA Skirt

Cover joints between the wall and the floor with **SHERA Skirt** and enhance the feelings of nature in your home with texture and color of real wood. **SHERA Skirt** comes with great properties ensuring durability, termite free, no rotting and no swelling from excess moisture. Using **SHERA Skirt** as a baseboard will not only help prevent stains on the wall while cleaning, but also give a neat and beautiful finish to your design.

Product Information

	Profile	Texture	Color	Size (cm.) (Thickness*Width*Length)	Weight (kg./pc.)
Skirt	Classic	Smooth	Uncolored	1.2 x 10 x 300	5.33
	Modern				
End Skirt	Classic	Smooth	Uncolored	1.2 x 10 x 100	1.83
	Modern				

Installing skirts along stair steps not only creates a beautiful finish along the edge but also gives visual cues on a flight of stairs, keeping everyone in your home safe.

SHERA Floor Board

It's time to take fiber cement flooring innovation to the next level with *SHERA Floor Board*. By being of better quality than any other wood-chip cement boards or typical plywood, *SHERA Floor board* can ensure durability in any weather conditions, resistance to water-fire-termites as well as the ability to support heavier weight, thus it can be a perfect flooring material throughout the building. Save your time and money by choosing floorboard that's designed for a quick installation. Plus you can conveniently apply *SHERA Floor Board* as a substrate for various finishings as well.

Product Information

<i>SHERA Floor Board</i>	Size (cm.) (Thickness*Width*Length)	Weight (kg./pc.)	Quantity (pc./sq.m.)	Application Area

SHERA Zedar Shake

Add a touch of natural beauty to your roof design with *SHERA Zedar Shake*, an innovative roof material that holds the natural look and beautiful texture of real wood. *SHERA Zedar Shake* possesses the finest quality, well-known durability guaranteed by high quality manufacturing processes, termite resistant property and Inter-Locking system, water leakage prevention system certified by ASTM C1530-04 Standard. You can rest assured that sub roof is not needed, installation time and cost will be lower, and maintenance is minimal.

Inspired by
The Beauty of Nature

Bring a little charm to your wood-like roof with our 'Color Through' technology, the method we use to pigment color thoroughly and evenly into the product. There're 3 shades of dark colors to be chosen from: Yellow Zante, Brown Chestnut and Black Wenge along with 3 tile widths to fit your design. Therefore it's easy for any designer and owner to craft their masterpiece home or building projects which are truly a feast for the eyes.

Site Reference

Yellow Zante 481

This is one of the bark themed colors that comes in a light yellowish shade, giving a sense of gentle and warm touch of nature like a color of pine trees in the summer or the warm light of the sun. And with the bark texture combined, this is a perfect way to fill your home with warmth and relaxation every day.

Brown Chestnut 482

Calm and comfort blend perfectly in this natural shade from our bark themed colors, designed by drawing out the beauty of pine trees in the rainy season. Pine trees turn into darker shade due to humidity in rain forest. This color will make your time at home feel even more peaceful, relaxing, and appealing.

Black Wenge 483

This dark shade of bark color comes with hidden charm and strength just like pine trees during winter. With the presence of white snow, the dark color creates contrast on the roof. And this sense of elegance and solemn is what makes your roof more attractive and stand out.

Metro Grey 484

This grey color represents coolness and luxury of metropolis. Inspired by worn out cedar roof, stain and uneven color is enhanced with grey color gradient to create the perfect harmony between nature and civilized society.

SHERA Eaves One Plus

This is the kind of eaves designed for roof decoration aiming for a "beautiful, durable and quick" finish. Cover joints between two materials and hide the untidy cut ends of roof's rafters and sheathing with eaves that are ready to use and complete in one step. **SHERA Eaves One Plus** is beautifully designed to mimic the appearance of 2 overlapping planks, creating dimensions for each piece. The texture is tough and non-brittle. Thickness options include 16 mm. and 22 mm. with the length options between 3 and 4 meters.

SHERA Eaves One Plus can reduce installation process from two steps down to one (compared to normal eaves installation)

DIAMOND CUT Technology

with Computer Numerical Control (CNC) makes cutting process precise and ensures all planks meet exact specifications.

Product Information

Profile	Texture	Color	Size (cm.) (Thickness*Width*Length)	Weight (kg./pc.)
One Plus	Smooth	Uncolored	1.6 x 23.5 x 300	15.29
			1.6 x 23.5 x 400	20.39
		Red Mahogany	2.2 x 23.5 x 300	21.33
			2.2 x 23.5 x 400	28.45

SHERA Eaves Drop

Represent Thai beauty with *SHERA Eaves Drop*, an ornately carved wood panel that combines the feature of eave and gable with elegant style. Crafted from Water Jet technology on a fiber cement, the pattern is delicate and beautiful throughout. And since *SHERA Eaves Drop* will serve as an outdoor material, it comes with durability under any weather condition as well as resistance to water, sunlight, rain, termite, insects, beetles, twist and shrinkage over a lifetime.

Installation Guides

SHERA Wood

SHERA Floor Plank Installation on timber/steel frame structure with screw

Fix *SHERA* floor plank that has been finished on all six sides with a primer to steel structure using *SHERA* Screw Fix-W45 (Use *SHERA* Screw Fix-T1 3/4" for timber structure). Fasten both sides of *SHERA* floor plank, or on the middle for the 6"/ 8" wide plank, to the joist by using screw along the length of the plank.

Screw positions should be at least 1.2 cm from *SHERA* floor plank's edge, and at least 2 cm from *SHERA* floor plank's end.

Remark : - Fasten the screws so that screw heads are flush evenly with *SHERA* floor plank's surface.
- Wherever on-site cutting applied to the product, the cut surface must be painted with equivalent water based coating system prior installation in order to prevent water/moisture absorbed into product. Ensure proper covering of the coating over the product for best performance

Installation *SHERA* Eaves

Install an 8" wide plank to the roof frame.

Install a 6" wide plank by overlapping with the 8" wide installed previously.

Apply primer.

Apply paint color.

Installation *SHERA* Eaves One Plus

"Complete the installation in one quick step by fixing two screws at each point at the end of rafter"

Tips on how to paint *SHERA* Wood

Instructions

	Cement Color	Primer Color	Uncolored
1. Prepare and clean the wood surface.			-
2. Apply <i>SHERA</i> Primer for old fiber cement on all 6 sides 1 time.		-	-
3. Apply <i>SHERA</i> Paint for fiber cement in transparent or monotone color 2 times.			-
4. Apply <i>SHERA</i> Top Guard to achieve a matte or glossy finish (suitable for floor plank or floor that require a high protection) 1-2 times.			

SHERA Tools and Equipment

SHERA Corner Piece, Smooth Texture

For internal and external wall cornering
Size (cm): 0.6 x 8 x 305

SHERA Sealant PU 25

For jointing gaps

Heat/Rain resistance	-	-	Pass
Soak/Dry resistance	BS EN 12467:2000	-	Pass

*Remark : SHERA BOARD has passed the test by Australia/New Zealand Standard (AS/NZ 2908:2:2000) and EU Standard (BS EN 12467: 2000) by PSB Corporation Singapore and TIS 1427-2540 certifying fiber-cement tiles in Thailand.

Bend Radius

SHERA Board is tough and highly flexible, bendable without applying water.

Horizontal bend radius of the board of each thickness

Selection for Application

Types of Application

Types of Application	Thickness (mm)								
	3.5	4	6	8	10	12	15	18	20
Interior ceiling	●	●							
Eaves/Ceiling/Arch		●	●						
Bending Wall/Interior Partition			●	●					
Subroof/Sunshade			●	●	●				
General exterior wall/Wet area				●	●	●			
High-rise building wall/Exterior building board					●	●			
Underlayment				●	●	●			
Raised Floor									
Weight (kg/ sq.m.)	5.36	6.12	9.32	12.42	15.52	18.63	22.42	26.91	29.90

Movement and Piling

Always raise the board vertically by raising the two ends

Pile the boards up at shady and on the flat and dry ground. The boards should be supported by 5 pieces of wood of 1.5"x3" wide as indicated in the schedule. Do not install and paint the board in wet condition.

Thickness (mm.)	Piling not exceeding (pcs)
4	300
6	225
8	150
10	120
12	105
15	90
18	75
20	60

Installation Guides

SHERA Board

Floor Installation

Finishing Materials : carpet, ceramic tile, rubber tile, engineered wood and laminate

Elevated floor installation

SHERA Board Product

Square-cut edge, 15-20 mm. thick

Type of frame

Structural steel frame :

with a minimum thickness of 2.3 mm.

Hardwood frame :

with a minimum dimensions of 1 1/2 x 3 inches

Joint Spacing

One-way joist at every 60 cm.

Two-way joist at 60 x 60 cm.

Joint Spacing

One-way joist at every 60 cm.

Two-way joist at 60 x 60 cm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Painting

Apply epoxy for indoor application.

Apply polyurethane for indoor and outdoor application.

Sub-floor board installation on existing concrete floor

SHERA Board Product

Square-cut edge, 8-12 mm. thick

Board fixing tools

Use cement adhesive or polyurethane adhesive with hammer and 1-1.5" concrete nails.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Wall installation

Finishing Materials : wallpaper, tile, laminate

General wall application

SHERA Board Product

Square-cut edge, 6-12 mm. thick for v-groove wall

Recessed edge, 6-12 mm. thick* for smooth finished wall

Type of frame

U75 and C75 galvanized frame with a minimum thickness of 0.55 mm.

Joint spacing

60 x 60 cm. or 60 x 120 cm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Tile wall installation

SHERA Board Product

Square-cut edge, 10-12 mm. thick

Type of frame

U75 and C75 galvanized frame with a minimum thickness of 0.55 mm.

Joint spacing

60 x 60 cm.

Fixing distance

At every 20 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Ceramic tile fixing tool

Cement adhesive

Brick wall installation alternative to plaster

SHERA Board Product

Square-cut edge, 6-12 mm. thick

Recessed edge, 6-8 mm. thick for interior smooth finished wall

Type of frame

C-Line galvanized frame no. 24, 0.55 mm. thick

Joint spacing

at every 60 cm. with vertical joint attached to bracket such as BPB ML75

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Ceiling installation

Sound or thermal insulated wall installation

SHERA Board Product

Square-cut edge, 6-12 mm. thick

Type of frame

U75 and C75 galvanized frame with a minimum thickness of 0.55 mm.

Joint spacing

60 X 240 mm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Mid-layer material

Sound or thermal insulation

Steel frame installation

SHERA Board Product

Square-cut edge, 3.2-6 mm. thick

for v-groove ceiling

Recessed edge, 6 mm. thick for smooth finished ceiling

Type of frame

C-Line galvanized frame no. 24

Joint spacing

Main section at every 90 cm.

Cross section at every 40 cm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Timber frame installation

SHERA Board Product

Square-cut edge, 3.2-6 mm. thick

for v-groove ceiling

Recessed edge, 6 mm. thick for smooth finished ceiling

Type of frame

Hardwood frame with dimensions of 1 1/2 x 3 inches

Joint spacing

60 cm. x 60 cm.

Fixing distance

At every 30 cm. with 1.2 cm. distance from the board's edge and 5 cm. from the corner

Tip on fixing the corners of SHERA Floor, Wall, Ceiling Board

Fix the screw at 1.2 cm. edge distance, with 5 cm. distance from the board's corner

* Recessed edge profile 10-12 mm. thick is a made to order item

Tools and Equipment

Fiber cement cutter

Electric screw driver

Electric saw

Cutter

SHERA cement jointing compound

SHERA Cement Jointing Compound For exterior and interior work; used for plastering joints of SHERA Wall Board, Recessed edge, together with SHERA fiberglass mesh tape.

SHERA fiberglass mesh tape

SHERA Fiberglass Mesh Tape Used for taping the joints of SHERA Wall Board, Inclined edge

SHERA Concrete Bonding Agent

SHERA Flexible Jointing Compound Smooth ceiling plastering work requiring high flexibility together with fiberglass mesh tape

SHERA sealant PU25
For sealing joints of interior and exterior works

SHERA barrel gun
Used with Sealant Size 310 and 600 ml.

SHERA screw fix - b

SHERA Screw FIX - b
For steel structure
0.55-1.2 mm thick

SHERA screw fix - w

SHERA Screw FIX - w
For steel structure
1-3.2 mm thick

SHERA screw fix - t

SHERA Screw FIX - t
For wooden structure

Schedule of Recommended Fixing of SHERA BOARD with SHERA Screws

Structure Type	SHERA Screws to be used with SHERA BOARD having several thickness (mm)			
SHERA BOARD Thickness	3.2-6 mm.	6-8 mm.	10-12 mm.	15-20 mm.
Galvanized steel structure 0.55-1.0 mm thick	FIX-B20	FIX-W20	FIX-W25	Not recommended
Structural steel 1.0-3.2 mm thick	Not recommended	FIX-W25	FIX-W32	FIX-W45
Wooden structure	FIX-T11/4"	FIX-T11/4"	FIX-T11/4"	FIX-T11/4"

SHERA Zedar Shake installation

Product Standards

Ultimate Strength (Bending Stress)	Minimum 1,700 N/m.
Impact Strength (Crack)	2,500 N/m., prior to water submission testing
Water proof property	No water droplets appears under the roof tile surface as specified by ASTM C1492-03
Frost Resistance (Specific Material)	Pass the test (Grade 2 = 100 rounds)
Durability	Passed 50 cycles of HRT with no visible cracks

Installation Techniques

	Straight Sheet Installation	Overlapped Sheet Installation
Length of Purlin	20 cm.	20 cm.
Overlap	15 cm.	13-17 cm.

*** Notes :** The tests for leakage of water and impact strength were conducted according to the industrial standards for Fiber Cement Roof product category. The roof tiles went under 24 hours of water submission to test for leakage of water. Prior to that, impact strength tests were conducted to compare the impact strength before and after 24 hours of water submission. Afterwards, the tiles underwent another impact strength test to determine the strength of fiber cement tiles.

To ensure the beauty and maximum efficiency of the roof, please use our installation service.

Inter-Lock System Installation Techniques

Beyond its beauty and natural perfection, SHERA Zedar Shake comes with a development on Inter-Lock system that provides great benefits to home building. With ASTM C1530-04 certified, roofing underlay is no longer necessary to prevent water leakage. SHERA Zedar Shake is also cost efficient and encourages creativity in tile arrangements, so you can take your roof design as far as imagination takes you.

1. Straight Sheet

Lay SHERA Zedar Shake next to each other with no spacing, making sure that the drain curve is parallel with the purlin or the tile's head is 4 cm. beyond the purlin as shown in the picture. Alternate the sizes of the tile appropriately to get a straight, uniform pattern at the roof edge.

2. Overlapped Sheet

Tile sheet can be laid at 3 different levels with 2 cm. variation

- **Low level:** the drain curve is parallel with the purlin or the tile's head is 4 cm. beyond the purlin.
- **Middle level:** the tile's head is 6 cm. beyond the purlin.
- **High level:** the tile's head is 8 cm. beyond the purlin, as shown in the picture.

Cautions

1. Tiles must be laid out in rows with shifting alignment at least 4 cm. from the previous row.
2. It's recommended that a box of roof tile is open and used up one at a time to reduce leftovers.
3. If roof pitch is below 25 degree, has a multi-level design or rafter length is over 10 meter, please contact the manufacturer for recommendations.

Appendix / Ceiling Application
